

Navigation Guide & Best Practices

CALANQUES NATIONAL PARK - LOCMYBOAT

Welcome aboard with LocMyBoat. Thank you for following good boating practices to ensure your safety, the safety of others, and the protection of our coastline.

Useful Contacts

LocMyBoat: +33 6 31 97 55 71

Navigation Area: Marseille and the Calanques (if authorized with a Calanques National Park permit/sticker).

Maritime Emergency: CROSS Méditerranée - VHF Channel 16

Sea Rescue Emergency: 196 (CROSS Emergency Number)

Useful Websites

Meteo Marine: meteo-marine.com

Calanques National Park: calanques-parcnational.fr

1. **Departure: Old Port of Marseille (Vieux-Port)**

Exit the harbor by following the marked navigation channel (green and red buoys). Navigate carefully until you reach open sea.

2. **Frioul Islands (Optional)**

Distance: 3 NM (approximately 30 minutes)
A beautiful archipelago, perfect for a swimming break and snorkeling. Recommended stops include Morgiret Cove or Saint-Estève Beach.

3. **Sormiou Calanque**

Distance: 7 NM (approximately 45 minutes to 1 hour)
A large bay with a sandy seabed, ideal for lunch and water activities.

4. **Morgiou Calanque**

Distance: 2 NM (approximately 20 minutes)
A small, wild and peaceful calanque. The anchorage area is narrow, so navigate with caution.

5. **En-Vau Calanque (Optional)**

Distance: 2 NM (approximately 15 minutes)
A stunning calanque nestled between high cliffs, with crystal-clear waters. Access can sometimes be challenging.

Return

It is recommended to return by following the coastline via Cap Croisette and Marseillevestre.

Estimated return time: 1 to 1.5 hours.

Please ensure that you return the boat at the time specified by the rental company.

What is an Electric Windlass?

An electric windlass is a motorized winch that allows you to raise and lower the anchor without manual effort. It can be operated from the helm station or by using the foot switch located at the bow.

Before Anchoring: Safety Checks

1. Is anchoring permitted in the area?
2. Is the seabed suitable (sand or mud, not seagrass beds)?
3. Maximum depth: 10 meters.
4. Ideally, choose an area where you can clearly see the bottom.
5. Allow 3 to 5 times the water depth in anchor chain.

Dropping the Anchor – Procedure

1. Put the engine in neutral.
2. Approach slowly into the wind or current.
3. Activate the windlass in the lowering position.
4. Let the anchor descend to the seabed.
5. Pay out the appropriate length of chain.
6. Reverse slowly to set the anchor.
7. Check that the anchor is holding firmly.

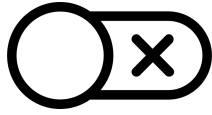

Retrieving the Anchor – Procedure

1. Start the engine.
2. Press the windlass "up" button.
3. Guide the chain and ensure it is stowing properly in the chain locker.
4. Move the boat forward if necessary to reduce strain on the windlass.
5. Secure the anchor firmly in its holder.

Never Do the Following

- Never leave the anchor hanging while underway.
- Never retrieve the anchor while reversing.
- Never use the windlass to pull the boat toward the anchor.
- Never allow children near the windlass.
- Never place fingers or hands inside the chain gypsy mechanism.

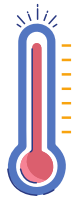

Common Issues

Windlass Not Working : Check the windlass motor fuses and circuit breaker.

Anchor Stuck : If the anchor becomes stuck, move the boat slowly forward while easing the tension on the chain to help free the anchor.

Overheated Motor : Allow the motor to cool down before using it again. If necessary, use the windlass emergency handle/key to manually release the anchor.

Environmental Protection

- Never anchor on seagrass beds.
- Always choose sandy areas for anchoring or use designated mooring buoys whenever available.

- Always wear your life jacket while underway.
- Check the marine weather forecast before departure and monitor changing conditions throughout your trip.
- Do not throw any waste into the sea; use the waste bag provided on board.
- Avoid excessive loud music, especially near the Calanques and other boats.
- Use designated anchoring areas only; never anchor on seagrass beds (Posidonia meadows).
- Respect marine wildlife: do not chase dolphins and do not engage in prohibited fishing activities.
- Stay reachable and keep your mobile phone charged.
- In case of emergency: contact CROSS Méditerranée on VHF Channel 16 or call LocMyBoat.

Welcome Aboard!
